

TECNET BASIC 100

CONCENTRATED DISHWASHER LIQUID DETERGENT– NO EDTA

Excellent for water from soft to very hard

High degreasing power

Usable with chlorine-based products

APPLICATIONS

Perfect for all types of industrial dishwashers and for all water types (from soft to very hard). Ideal for use in all situations where the disinfecting action of sodium hypochlorite is required: the absence of EDTA allows it to be combined with chlorine-based products.

FEATURES

"Concentrated dishwasher detergent with high alkalinity and strong degreasing power. Excellent for all types of water, from soft to very hard. Formulated to be particularly effective on fats, protein residues, and colored stains (coffee, lipstick, tea, etc.). Thanks to the presence of many chelating agents and suspending agents, it prevents the unpleasant formation of halos and spots on glasses and dishes. It does not contain EDTA, so it can also be used with chlorine-based products (sodium hypochlorite).
