

POOL FLOC

SWIMMING POOL FLOCCULANT

Helper for physical filtration systems

Increases the filtering power

Prevents turbidity

APPLICATIONS

Specific flocculant to remove and prevent the formation of suspensions, due to the clouding of the water.

FEATURES

Product based on a hygroscopic active principle which, when hydrated, aggregates in reticulated flakes; these are deposited on the sand of the filter, increasing its filtering power.

Helper for physical filtration systems, it allows to remove suspensions, guaranteeing a high level of water transparency.

INSTRUCTIONS FOR USE

We recommend using the product as indicated below.

Elimination of cloudiness:

- pour 30-60 g of product into the furthest skimmer every 10 m3 of water
- perform a backwash every 4/5 hours of filtration and make a new flocculation until you obtain the desired clarity.

Prevention of cloudiness:

- pour 30-60 g of product into the furthest skimmer every 10 m3 of water
- flocculate every time the filter is backwashed.

Strictly comply with the dosages, an excess of product may cause cementation of the sand inhibiting filtration

PACKAGING:	Standard packages		N° pieces for carton	N° cartons / packages for pallet	N° pieces for pallet
	Tank	Kg 10	-	-	60

CHEMICAL-PHYSICAL INFORMATIONS:	Parameters	U.M.	Values	Method of analysis
	Aspect:	-	Liquid	Visual
	Colour:	-	Colourless	Visual
	Perfume:	-	No perfume	-
	pH:	-	3,2 ± 0,5	Instrumental
Density:	Kg/dm ³	1,11 ± 0,05	By weighing	

HAZARD: Reg. (CE) 1272/2008		H319: Causes serious eye irritation.
	WARNING	

We recommend for use, packaging etc. to follow instruction on label and/or on safety data sheet. This technical data sheet nullifies and replaces any precedent edition.
