

POOL PH+

SWIMMING POOL PH REGULATOR

Increases pH producing a buffer
Prevents corrosion of accessories
pH control kit available

APPLICATIONS Complementary product for swimming pools designed to integrate the pH in the pools.

FEATURES Specific formulation to be dosed manually directly in the swimming pools. The pH adjustment is fundamental, as well as to comply with the legal requirements, also to keep a high quality level of the structures and water; in fact a too low pH can cause corrosion of accessories, deterioration of the walls, irritation of skin and eyes and instability of disinfectants.

INSTRUCTIONS FOR USE The water pH must be between 7.2 and 7.6 and must be checked daily. To prepare a buffer solution, proceed as follows:

Add 100-500 g per 100 m³ of water directly into the pool.

The recommended dosages are approximate and depend on water hardness, number of bathers and pH of the starting water.

PACKAGING:	Standard packages		N° pieces for carton	N° cartons / packages for pallet	N° pieces for pallet
	Capsule	Kg 2		4	40

CHEMICAL-PHYSICAL INFORMATION:	Parameters	U.M.	Values	Method of analysis
	Aspect:	-	Solid	Visual
	Colour:	-	White	Visual
	Perfume:	-	No perfume	-
	pH (sol. 1%)	-	9,9 ± 0,5	Instrumental
Density:	Kg/dm ³	0,55 ± 0,05	By weighing	

HAZARD: Reg. (CE) 1272/2008		H319: Causes serious eye irritation.
	WARNING	

We recommend for use, packaging etc. to follow instruction on label and/or on safety data sheet. This technical data sheet nullifies and replaces any precedent edition.
