

TECNET ETO PROXY

BLEACH ALREADY EFFECTIVE AT LOW TEMPERATURE

Sanitizing, deodorizing and bleaching actions

Peracetic based bleach

Removes viruses, bacteria, fungi and yeasts

APPLICATIONS

Formulation based on peracetic acid for deodorize, remove stains, sanitize and remove viruses, bacteria, fungi and yeasts.

Bleach used in the washing phase, on white and colored fabrics; exerts an effective action on organic and pigmented spots (wine, grass, coffee ..), already at low temperatures.

Also suitable for sanitizing surfaces and installations C.I.P.

FEATURES

Solution containing peracetic acid, acetic acid and hydrogen peroxide stabilized at equilibrium to ensure its effectiveness over time; can be used in all types of water.

Formulated with marked efficacy even at low temperatures, particularly suitable as an oxidant for fabrics sensitive to high temperatures.

Product designed to be automatically dosed in laundries: it can be used in combination with surfactants, alkalisers and chlorinated bleaches (in the prewash phase); the washing cycle can be concluded with a neutralizing softener.

INSTRUCTIONS FOR USE

The product performs the oxidizing action with temperatures above 30 ° C.

Recommended dosages:

Laundry bleaching: 4 – 12 g/kg of linen

Food surfaces and machineries sanitation: solution 4 g/l of water

CIP sanitation: solution 0,25 – 0,50%
