

TECNET CREVIT

METALLIZED FLOOR WAX WITH HIGH CROSS-LINKED POLYMERS

Treading resistance

Protects the floor over time

Creates a polished and anti-slip film

APPLICATIONS

Metalized wax for treatment of surface in PVC, linoleum, gres, klinker, ceramic, rubber. Suitable also for porous floors such as terracotta, natural stone, non-treated marble and not glazed wood.

FEATURES

High reticulation metalized wax suitable for every kind of floor, designed for high foot traffic surfaces.

Usury and scratches resistant emulsion, it protects the floor from moisture and usury.

Acrylic dispersion-based formula, it greatly resists to maintenance (450 – 1000 rpm).

INSTRUCTIONS FOR USE

It is recommended to use the product as follows:

For smooth floors waxing:

- Thoroughly clean with a wax remover to remove dirt and possible wax stratification and let it dry
- Apply the first coat smoothly with proper wax spreader
- Wait for complete drying and then spread the second coat in the opposite direction of the first one

For porous floors wacing:

- Clean the floor with a proper detergent
- Spread a sealant for porous surfaces with proper applicator
- Apply the first coat smoothly with proper wax spreader
- Wait for complete drying and then spread the second coat in the opposite direction of the first one
