

ENERFOR EARLYSAN

PRE-MILKING SANITIZING DETERGENT BASED ON LACTIC ACID AND HYDROGEN PEROXIDE

Does not leave any residues that can interfere with cheese-making process

Generates a clinging dry foam

Restores skin's natural pH

APPLICATIONS

Pre-milking foam for dairy cattle's nipple cleaning by immersion.

FEATURES

Product with marked detergent action, it creates a dry foam which restructures and makes tonic and elastic the female dairy cattle's nipple skin before milking.

Formula with active principles highly degradable, it does not leave residues which inhibit the cheese-making process.

Product with foaming, emollient and sanitizing agents, it makes milking handy and safe.

Thanks to the presence of active lactic acid, it restores the natural pH of the skin.

INSTRUCTIONS FOR USE

It is recommended to use the product as follows:

- Use pure before milking, soaking every nipple into the product
- Leave on the foam for 10-15 seconds
- Dry up the nipple using paper tissues or single-use clothes

PACKAGING:	Standard packages		N° pieces for carton	N° cartons / packages for pallet	N° pieces for pallet
