

SILTERMAX

NEUTRALIZING SOFTENER

Strong neutralizing action

Neutralizes detergent residual alkalinity

Eases the passage of fabric in the mangle

APPLICATIONS

Concentrated adjuvant to be used in the rinse phase; it gives softness and antistatic properties to the fabric, neutralizing alkaline residues of detergents

FEATURES

It favours less water detention in the fabrics after discharge and centrifuge, allowing energy and time savings in the drying.

Formula with lubricant properties, it reduces fuzz formation and separation in the rotating dryer machine, increasing fabric smoothness during ironing process.

Destaticizing product, it operates a reduction of electrostatic charge in the fibres, favouring folding operations and avoiding wrappings on mangle.

Low-viscosity formula, it allows the use with automatic dosing systems or petistaltic pumps.

INSTRUCTIONS FOR USE

Dose 5-20 g of product for each kilo of dry laundry according to the quantity of alkaline product used and water hardness.
