

ENERFOR STABILOX 30

STABILIZED OXYGEN BLEACH

Active oxygen-based bleach
 Effective on organic and coloured stains
 Removes viruses, bacteria, fungi, and yeasts

To counter the health emergency from COVID-19, the Ministry of Health and the ECDC-European Centre for Disease Prevention and Control prescribe, for cleaning the environments, water and common detergents and the subsequent use of hydrogen peroxide in a concentration of at least 0.5%.

APPLICATIONS

Hydrogen peroxide-based product capable of deodorising, removing stains, sanitizing and removing viruses, bacteria, fungi and yeasts. Bleach used in the washing phase on white and coloured fabrics, exerts an effective action on organic and pigmented stains (wine, grass, coffee ..).
 It can be added during the rinse phase to neutralize the residues of chlorinated detergents used in the pre-wash.
 Also suitable for the sanitation of surfaces and C.I.P. systems.

FEATURES

Stabilized hydrogen peroxide-based whitener to ensure its effectiveness over time; it can also be used in hard water thanks to the addition of a sequestering active.
 The product is designed to be automatically dosed in laundries: it can be used in combination with surfactants, alkalizers and chlorinated bleaches (in the pre-wash phase); the washing cycle can be concluded with a neutralizing softener.

INSTRUCTIONS FOR USE

The product has an oxidizing action with temperatures between 60 and 80 ° C; it is advisable to follow the dosages:

As whitening:	15 – 25 g/kg of dry laundry
As sanitizing:	17 – 20 g of product per liter of water
As chlorine neutralizer:	up to 1 g

PACKAGING:	Packaging		Pcs x box	Boxes x pallet	Pcs x pallet
